The Journal of the JIMA is an official publication of the Japan Industrial Management Association (JIMA), which has a history of more than 70 years.

At this time, we are calling for the submission of papers which focus on the subject of “Industrial management theory and practice in DX”. We look forward to the submission of many valuable papers describing the results of theoretical and experimental research related but not limited to the following topics:

- (1) Business Model and Strategies
- (2) Servitization Strategies and Product Service Systems
- (3) Product Development and Innovation
- (4) Customer Experience Analytics for Marketing
- (5) Data Analysis and Visualization
- (6) Data Analytics and Smart Manufacturing
- (7) Systems Integration
- (8) Robotic Process Automation Applications
- (9) Productivity Improvement Case Study
- (10) Data-driven Predictive Maintenance and Production Planning
- (11) Solution Techniques and Models of SCM
- (12) Risk Identification and Evaluation
